

Using AI in Healthcare: Questions for Healthcare Providers (English, French, Dutch)

Against a backdrop of staff shortages, high costs, and other systemic pressures, healthcare institutions are increasingly turning to digital solutions to bridge these gaps, including the deployment of AI-enabled systems. Although these may provide some opportunities for increasing efficiency under strict circumstances, using AI in healthcare may also pose risks to patients and their rights.

Healthcare providers have a role to play in mitigating some of these risks. To help raise awareness and support informed discussions, members of the [Digital Rights and Health Alliance](#) have developed a set of prompt questions to stimulate further dialogue on this topic – particularly between providers and their patients.

Anyone can join the conversation. Download the resource for free [here](#), and start a discussion with your patients or healthcare provider today!
