CHAD
National Pharmaceutical Sector form

Date: 7th May 2004

Population: 8.038.270

Daily wage of lowest paid government worker: 849,4 FCFA

Rate of exchange (commercial “buy” rate) to US dollars on the first day of data collection: 542,94

Sources of information: Commercial Bank Tchad
General information on the pharmaceutical sector

Is there a formal National Medicines Policy document covering both the public and private sectors? ☑ Yes ☐ No

Is an Essential Medicines List (EML) available? ☑ Yes ☐ No

If yes, state total number of medicines on national EML: 287
If yes, year of last revision: 1999
If yes, is it (tick all that apply):
☑ National
☐ Regional
☐ Public sector only
☐ Both public and private sectors
☐ Other (please specify): for mission health facilities

If yes, is the EML being used (tick all that apply):
☑ For registration of medicines nationally
☑ Public sector procurement only
☐ Insurance and/or reimbursement schemes
☐ Private sector
☑ Public sector

Is there a policy for generic prescribing or substitution? ☑ Yes ☐ No

Are there incentives for generic prescribing or substitution? ☑ Yes ☐ No

Public procurement

Is procurement in the public sector limited to a selection of essential medicines? ☑ Yes ☐ No

If no, please specify if any other limitation is in force:

Type of public sector procurement (tick all that apply):
☑ International, competitive tender
☑ Open
☑ Closed (restricted)
☐ National, competitive tender
☐ Open
☐ Closed (restricted)
☐ Negotiation/direct purchasing

Are the products purchased all registered? ☑ Yes ☐ No

---

1 If there is a public procurement system, there is usually a limited list of items that can be procured. Products procured on international tenders are sometimes registered in the recipient country only by generic names. Import permits to named suppliers are issued based on the approved list of tender awards. An open tender is one that is publicly announced; a closed one is sent to a selection of approved suppliers.
Is there a local preference?\(^2\)  ☐ Yes  ☐ No
Are there public health programmes fully implemented by donor assistance which also provide medicines?  ☒ Yes  ☐ No
If yes, please specify: TB, Leprosy, Onchocerciasis

**Distribution**\(^3\)
Is there a public sector distribution centre/warehouse?  ☒ Yes  ☐ No
If yes, specify levels: 3 levels
Are there private not-for-profit distribution centres: e.g. missions/nongovernmental organizations?  ☐ Yes  ☒ No
If yes, please specify:
Number of licensed wholesalers: 4

**Retail**

**Private sector**\(^4\)
Are there independent pharmacies?  ☒ Yes  ☐ No  Number: 23
Are there chain pharmacies?  ☐ Yes  ☒ No  Number:  
Do doctors dispense medicines?\(^5\)  ☐ Yes  ☒ No
If yes, approximate coverage or % of doctors who dispense:  
Are there pharmacies or medicine outlets in health facilities?  ☒ Yes  ☐ No

---

\(^2\) A local preference means that local companies will be preferred even if their prices are not the cheapest. Local preference is normally in the range of 10–20%.

\(^3\) The public sector often has a central storage and distribution centre which may have at least one sublevel. The private not-for-profit sector may be dominated by one type of NGO (e.g. church missions), but may also comprise others such as Bamako Initiative type projects, Red Cross or Red Crescent Society, Médecins Sans Frontières.

\(^4\) Retail outlets may be called pharmacies, medicine outlets, drug stores, chemists, etc. They may be run/owned by a qualified pharmacist (with diploma) or another category: e.g. pharmacy technician, or a lay person with short training.

\(^5\) Many countries allow doctors to dispense and sell medicines.
Financing
(Give approximate figures, converted to US dollars at current exchange rate: commercial “buy” rate on the first day of data collection)
